ANOTHER GORDIAN KNOT CUT.

A Discovery Invaluable to the Science of Medicine.

An Invention That Will Be of Benefit to Thousands of People.

There is no doubt about the value of Vinel, this new form of cel liver oil, concerning which so much has been concerning which as innother one of said lately. It is just another one of those great inventions that is bound those great inventions a certain branch of to revolutionize a certain branch of science. This time the science is that of saving lives. Hence the greater good that will be derived from this

The Brock & McComas Co. of this city, who so fortunately succeeded in associating themselves with the prominent Boston firm, have made their name one that will never be forgothame one that will never be longot-less in our city. Their foresight and shrewdness enable them to take advan-tage of what has proven to be a most wonderful blessing to all who are in need of medicine for the cure of throat, lung and bronchial troubles, as well as wasting diseases of every de-

This Vinol is simply cod liver oil in a new form, cod liver oil without any oil, paradoxical as the statement may sound. In other words, the Brock & McComas Co. explain it themselves. Vinol is the concentrated essence containing all the active medicinal prin-ciples found in the liver of the live cod without any of the obectionable features that were formerly extract-ed at the same time, such as fatty matter. The extract which is the basis of Vinol, becomes tasteless, administered as it is in a delicate table wine. The efficient manner in which it acts is really wonderful. Physicians are now able to prescribe for patients Vinol, where it would have been impossible a short time ago to have recommended cod liver oil on account of the depleted condition in the patient's disestive organs.

This has always been a drawback that has prevented more cures being effected where cod liver oil has been indicated. Patients are now able to

It is not often we believe it our duty to expatiate so fully on a subset, but this is one that will admit of careful Investigation by all, for it is indeed of the gravest importance that every one should become conversant with a remedy that is so often needed in our

How Travel Enriches Railroads

The head of every family that setties in a new country is worth to the railroads from \$150 to \$250 a year. The rallroads, therefore, are very active promoters of immigration. The Southern Pacific road publishes Sunset, a monthly magazine, to set forth the attractions of the country through which the road runs. The Rock Is-land and the Santa Fe roads issue monthly papers. The Western Trail and The Earth, devoted to an exploit-ation of the advantages of their realms, and the Great Northern circulates an annual bulletin of much separate states it traverses. The cost of the other advertising that they do in the newspapers and the same general type for each of the newspapers and periodicals uge sums, says the World's costs huge sums, says Work

In March of last year, one railroad made public a list of 182 business openings in the cities of Oklahoma, and, before the end of April, 42 of these were selzed. Some days brought in over 600 letters of inquiry to the ntral office, all of which were taken up in order and handled systematical-ly. John Smith of Illinois, for inice, writes that he is dissatisfied with local commercial conditions, that he has a capital of \$3800 to invest and he wishes to know if sum is sufficient to build an oil-mill.
needed, according to the advertisement at El Reno, Oklahoma; whereupon Mr. Smith is put into communication at once with the Commercial Club at El Reno—an institution founded to push the interests of that place-and the club endeavors to prevall on him to cast his fortunes with theirs, if not for an oil-mill, why, then, for one of the innumerable other prizes that a thriving town like other prizes that a thriving town like ing in the factories.

El Reno offers to an able, energetic man like Mr. Smith. No town in Oklahoma is without its commercial club. One railroad alone established 25 of them. Working in conjunction gravel and stone, and considerable with these clubs is a body of industrial agents where dury it is to still the complexities of the temple will be a force of the features.

The process of filling up the country intensifies a struggle for existence which is already too keen, and stimulates a growth that is already going on take the medicine without the slightat an abnormal rate. Towns in Okest inconvenience. In fact, to take
the inconvenience. In fact, to take
the inconvenience. In fact, to take
the inconvenience is a pleasure. Its benseficial effact is most gratifying.

It is not often we believe it our duty tween stations is enormous. The trains are always filled, and the stations are crowded.

From a coign of vantage in Woods county, south of Alva, nine towns can be seen with the aid of a spy-The fortunes of the cities fluctuate. Six months after its opening, Lawton boasted of 133 saloons, 263 lawyers, and about an equal number of doctors; and today, in this three-year-old town, the "to-let" signs flaunt ominously from all sides. Four ago, Perry had about 30,000 inhabitants: today it has about 10,000,

In North Dakota, the Great North-ern railroad met with an entirely different condition of affairs. Even in the memory of the present generation North Dakota seemed far off and inaccessible. Foreigners went there from Canada and Europe before Americans would venture. In the days of its early development, unlike Oklahoma, it was not encircled by populous and thriving states, but, for the most part, by a territory equally empty of settlers. In the early '80s, there was a great influx of an agri-cultural pessantry from the north of Europe to America. These, with Canadians from across the border, formed the greater part of the first tide of immigration to North Dakota. In 1800, North Dakota's foreign-born population formed 58.7 per cent of the whole. There were more than 42,-000 Scandinavians and Danes; more than 25,000 Canadians; almost 15,000 Russians, and more than 11,500 Gerans. Another striking difference between Oklahoma and North Dakota is-Americans were in Oklahoma beforeigners knew of its existence.

square miles to overshadow Oklaho-ma's 38,175, and its larger area is population. Concentration was never necessary. In addition, the natural tendency of the rural-born-and-reared foreigner was toward selecting a quarter section, rather than a town lot. So, when James J. Hill, president of the Great Northern railroad, invaded North Dakota and the other north-western states, he found there wast stretches of rolling prairie land, the monotony of which was unrelieved by towns, and a conservative people not likely to keep abreast of its opportu nities. His first task, then, was to induce sufficient numbers of progressive immigrants to settle in his territory neglecting the rearing of cities, on the theory that towns would come in the due course of events. Therefore, the agents fostering northwestern immigration devoted their atten tion to young men and fathers of large families—expend their efforts on people with brains and energy, rather than on people of capital. tion to young men large families expen

\$100 Reward \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that acience has been able to cure in all its stages, and that is catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and nucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it falls to cure. Send for list of testimonials. Address: F. J. CHENEY & CO., Toledo, O. Sold by Druggists, The.

JAPANESE PRINCE COMING.

Is a Cousin of the Mikado and Will Visit Roosevelt.

Washington, D. C., Oct. 31.-At the Japanese legation on N street there is much stir and bustle these days, for elaborate arrangements are being made for the reception and en-tertainment of Prince Fushimi, first cousin of the emperor of Japan, who is now on his way to San Francisco and is expected to arrive in this city

about the latter part of next week.

Prince Fushimi is the ranking Prince Fushimi is the ranking prince of the army, as Prince Arisugawa is of the navy. As a lieutenant-general he commanded the first division at the battle of Nanshan Hill. and participated in the preliminary operations before Port Arthur. He has since been promoted to a full

The announcement that the prince will come direct to Washington be-fore visiting the St. Louis exposition has given rise to a report that he has been sent to enlist the aid of Presi-dent Roosevelt in bringing the war with Russia to a termination. This report is vigorously denied at the Jap-anese legation, who explain that he will call upon the president merely to pay his respects.

NEW TEMPLE IN MION.

Will Hold 16,000 People and Cost

Chicago, Ill., Oct. 31.-Tomorrow is to be a great day at Dowie's Zion City. The entire population will suspend work and attend the cerem which will accompany the breaking of ground for the new tabernacle. which is to cost \$600.000 and accom-modate 16,000 persons. The con-struction will provide employment for all the men in Zion City not work-ing in the factories.

trial agents whose duty it is to study the needs and the opportunities of each community and to submit itemized reports thereon to the central office of the railroad.

The structure completed in a year and a half. While it has been generally believed that the new terms of the central office of the railroad. lieved that the new temple was to be the permanent place of worship for Zion, Dr. Dowie now announces that after five or six years it would be converted into a college building. By that time Dowie believes he will have erected another temple to accommodate 30,000 persons.

THE CLOSING WEEK.

Fairbanks Speaks for a Week in Indiana.

Indianapolis, Ind., Oct. 31.-At 7:30 o'clock this morning Senator Fairbanks, Republican nominee for vice-president, left this city on a special train for his closing tour of the compaign. The entire week will be can paign. The entire week will be spent in Indiana. Night speeches will be made at Fort Wayne, Hammond. Lafayette, Terre Haute, Evansville and Indianapolis in the order named. In addition to these cities, speeches of fifteen minutes or a half an hour's duration will be made at more than fifty points throughout the state.

Senator Beveridge will be with the special a part of the time, as will J. Frank Hanley, the nominee for governor, and Secretary of the Treasury Leslie M. Shaw. The tour will end in Indianapolis next Saturday night, when Senator Fairbanks will deliver his closing address on the porch of his home on North Meridian street.

Amnigamation of Labor Bodies.

Washington, D. C., Oct. 31 .- After many months of negotiation, the am-algamation of the International Asso-ciation of Machinists and the International Association of Allied Metal Mechanics, two of the strongest and most infiential labor organizations of America, became sective today. The amalgamation was agreed upon at a amainstruction tas agreement that Au- had by killing the germ; and there gust, since which time the officers of other preparation that will destroy the two bodies have been busy completing the final details. We Offer \$1,000

For a Disease Germ That Liquozone Can't Kill.

On every bottle of Liquozone we ery. We did this after testing the publish an offer of \$1,000 for a disease product for two years, through physical physic

to convince you that Liquozone does as we claim.

Please note what that means. Any drug that kills germs is a poison, and it cannot be taken internally. Medicine is, therefore, aimost helpless in any germ disease. Liquozone alone can kill germs in the body without killing the tissues, too.

Acts Like Oxygen.

Liquozone is the result of a process which, for more than 20 years, has been the constant subject of scientific and chemical research. Its virtues are derived solely from gas, made in large part from the best oxygen producers. By a process requiring immense apparatus and 14 days time, these gases are made part of the liquid product. The result is a product that does what oxygen does. Oxygen gas, as you know, is the very source of vitality, the most essential element of life. Liquozone is a vitalizing tonic with which no other known product can compare. But germs are vegetables; and Liquozone, which—like oxygenis life to an animal, is deadly to vegetal matter.

Can kill germs in the body without kill in the world cannot do without it. It does in germ diseases that which is impossible with drugs. It carries into the blood a harmless yet powerful germicide, to destroy at once and forever the cause of any germ disease. And make make with drugs. It carries into the blood a harmless yet powerful germicide, to destroy at once and of orever the cause of any germ disease. And make make with drugs. It carries into the blood a harmless yet powerful germicide, to destroy at once and of orever the cause of any germ disease. And make make with drugs. It carries into the blood a harmless yet powerful germicide, to destroy at once and of orever the cause of any germ disease. And make make with drugs. It does in germ diseases that which is given death of the cause of any germ disease. And make with drugs. It does in germ diseases that which is of a process which with drugs. It does in germ disease, and of orever disease, and of orever disease, and of there.

Carrie Disease that which is cliquozone with the does in germ dis compare. But germs are vegetables; and Liquozone, which-like oxygenis life to an animal, is deadly to vege-
